DIRECTIONS FOR USE

ARBORCHEM CLEAN CUT is a combination of superior grade petroleum oils plus environmentally sound surfactants for use on non-crop, industrial sites such as utility, railroad and pipeline rights-of-way, wetlands, forestry, roadsides, substations, plant sites, drainage ditches, switchyards, logging roads and bridge abutments.

ARBORCHEM CLEAN CUT increases the effectiveness of most postemergence weed and woody plant herbicides by improving the wetting and spreading of spray solutions and enhancing the penetrating characteristics of herbicides. ARBORCHEM CLEAN CUT also replaces diesel oil or fuel oil as a late season spray additive.

RATES

Low Volume aerial or ground	0.5-1 qt./acre
High Volume ground spray	1 qt./100 gal.

Double above rates for late season or where additional wetting or penetration is required.
